## Actuarial and Market Rates of Return

Actuarial return reflects an averaging/smoothing process of market returns. Actuarial and market return for the year ended

9/30/2014 are based on draft financial statements.

## Actuarial and Market Value of Assets <br> (in \$Millions)

The Market Value of Assets has declined by almost 30\% since 2007.

The decline in funding \% since 1999 is due in a large measure to statutory contributions being significantly less than needed for proper actuarial funding of the System.

## Comparison of Funding \% and Contribution \%

## Actuarial, Employer and Employee Contribution Amounts (in \$Millions)

The annual contribution deficit on a dollar basis for 2014 is $\$ 129.9$ million. The projected contributions for 2014 include the increase to employee and employer contribution rates effective January 1, 2015.

## Actuarial, Employer and Employee Contribution Rates

At the current level of employer and employee contribution rates, there is a projected deficit of $36.5 \%$ of pay between the actuarially determined contributions and actual contributions after reflecting the increase to the employer and employee contribution rates effective January 1, 2015.

## Comparison of Normal Cost and Contribution Rates by Tier for the year beginning October 1, 2014

|  | Tier 1 | Tier 2 | Total |
| :--- | :---: | :---: | :---: |
| 1. Total Salary (\$Millions) | $\$ 246.7$ | $\$ 108.9$ | $\$ 355.6$ |
| 2. Normal Cost |  |  |  |
| - Dollar (\$ Millions) | $\$ 27.1$ | $\$ 9.5$ | $\$ 36.6$ |
| - Percent of Salary | $11.0 \%$ | $8.7 \%$ | $10.3 \%$ |
| 3. Employee Contribution <br> Rate | $9.1 \%$ | $9.4 \%$ | $9.2 \%$ |

Tier 2 employees have a lower normal cost percentage than Tier 1, but a higher average contribution rate.

## Agenda

## 1. Preliminary Actuarial Valuation and Review as of October 1, 2014

## 2. Projections of Market Value of Assets and Impact of Proposed Pension Reform Legislation

## 3. GASB 67/68 Implementation

This presentation was prepared under the supervision of Rocky Joyner, ASA, FCA, MAAA, EA, and Aldwin Frias, FSA, FCA, MAAA, EA

## Projection Parameters

## Projection Assumptions:

$>$ The active population is assumed to remain level at 9,227 employees
$>$ Total payroll of $\$ 355.6$ million is assumed to increase $2.5 \%$ per year, but not greater than $\$ 615$ million to reflect the $\$ 65,000$ salary cap for Regular and Public Safety employees.

- Under the scenarios showing increases in employer contribution rates, payroll is assumed to remain level during the period of contribution rate increases and then increase 2.5\% per year thereafter in addition to any increases due to changes in salary limits.
- Administrative expenses are assumed to be $\$ 16$ million during the fiscal year ending September 30, 2015 then increase with inflation
$>$ Future actuarial accrued liability and expected benefit payments were determined based on an open group forecast with the number of active participants assumed to remain level and the new entrants to have similar characteristics to those hired in the past five years.
- Projected benefit payments and actuarial accrued liability were updated based on the proposed pension reform legislation
$>$ Unless otherwise stated, assets are assumed to earn a 7.5\% market return each year

## Projection Parameters continued

## Caveats:

$>$ The closer the plan gets to insolvency, asset illiquidity may become an issue and earning the assumed return may become more difficult.
$>$ Projections, by their nature, are not a guarantee of future results. The modeled projections are intended to serve as estimates of future financial outcomes that are based on the information available to us at the time the modeling is undertaken and completed, and the agreed-upon assumptions and methodologies described herein. Emerging results may different significantly if the actual experience proves to be different from these assumptions or if alternative methodologies are used. Actual experience may differ due to such variables as demographic experience, the economy, stock market performance and the regulatory environment.
> Periodic review and updates of projections should be performed to measure how well the proposed plan modifications are working out in actual practice.

## Comparison of Projected Market Value of Assets Assumes 7.5\% Market Rate of Return for all years

## Comparison of Projected Market Value of Assets

## Projection of Market Value of Assets (in \$Millions)

Annual Net Investment Return: 7.5\%
Employer Contribution Rate: 17.5\% of payroll increased to 20.5\% effective January 1, 2015 Employee Contribution Rate: 3.0\% increase over three years beginning in 2015 (for all employees)

| 2034 | 65.2 | 116.5 | 119.1 | 272.8 | 28.1 | - | - | 0\% |

After reflecting the contribution rate increases, projected insolvency is during the year ending September 30, 2025, a two year delay from the prior scenario.

## Summary of Proposed Pension Reform Legislation

## Plan of Benefits

> For all regular and public safety employee provide benefits for salaries above $\$ 65,000$

- $1 \%$ of the difference between each year's salary and $\$ 65,000$ if the salary is over \$65,000
- Benefits above \$65,000 are limited to the Social Security cap $(\$ 118,500)$ in 2015
- Applies for plans years on or after October 1, 2015
> Tier 2 benefit accruals based on compensation each year and no longer based on average compensation at retirement (i.e. career average benefit design)
- We have assumed this change would be made for all years of service not prospectively
> Prior proposed changes including modifications to retirement ages for Tier 2 employees and a reduction in Tier 1 benefits were not included in this study

## Contribution Rates

No additional contribution rate increases are included in the proposed pension reform legislation other than the following increases effective January 1, 2015:

- Employer: Effective January 1, 2015 the contribution rate increased from $17.5 \%$ to 20.5\%.
- Employee: Effective January 1, 2015 the contribution rate increased $1 \%$, followed by two additional annual increases of $1 \%$.
$>$ As a result of the change in the plan of benefits to allow for benefit accruals above salaries of $\$ 65,000$, contributions will also be made for salaries in excess of $\$ 65,000$.

## Actuarial Cost Analysis (in \$Millions) Impact of Proposed Pension Reform Legislation

Proposed Changes to Benefit Provisions - Effect on Total Costs Amounts Based on October 1, 2014 Actuarial Valuation (\$Millions)

|  | October 1, 2014 | Proposed Pension Reform |

## Comparison of Alternative Annual Plan Costs Impact of Proposed Pension Reform Legislation

These results are based on the October 1, 2014 valuation and reflects the impact of the Proposed Pension Reform Legislation summarized on slide 30

## Comparison of Normal Cost and Contribution Rates by Tier as of October 1, 2014

| Tier 1 <br> Current Plan | Tier 1 <br> Proposed Changes | Tier 2 <br> Current Plan | Tier 2 <br> Proposed Changes |  |
| :--- | :---: | :---: | :---: | :---: |
| 1. Total Salary (\$Millions) | $\$ 246.7$ | $\$ 257.4$ | $\$ 108.9$ | $\$ 112.3$ |
| 2. Normal Cost |  |  |  |  |
| • Dollar (\$ Millions)* | $\$ 27.1$ | $\$ 27.0$ | 89.5 | $\$ 8.7$ |
| • Percent of Salary | $11.0 \%$ | $10.3 \%$ | $9.4 \%$ | $9.7 \%$ |
| 3. Employee Contribution <br> Rate | $9.1 \%$ | $9.1 \%$ | $-0.7 \%$ | $-1.7 \%$ |
| 4. Net Employer Normal Cost | $1.9 \%$ | $1.2 \%$ |  |  |

The decrease in the normal cost of Tier 2 employees is primarily due to the change from a final average salary design to a career average salary design.
